

Chest Bottle

in carton 8 PCS

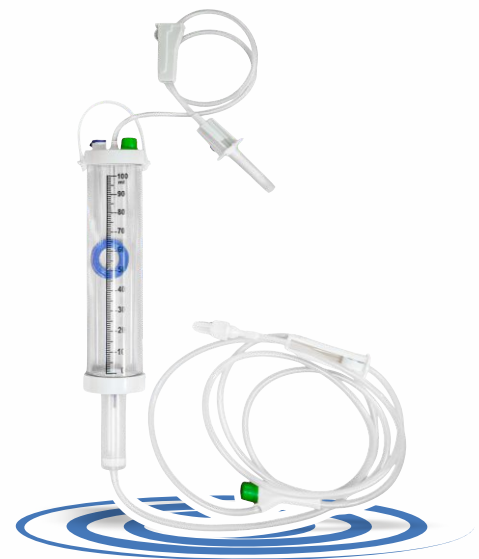

- The material of the tubes is PVC Medical Grade with very high quality and resistant to any kind of twisting.
- It has a blocking clip for easy removal and complete separation, without causing pollution and leakage in the environment.
- Bottle 2000 cc, made of transparent polystyrene with high thickness and impact resistant to prevent cracking and breaking during use in treatment.
- Inlet funnel for solution
- If diagnosed, the treating physician can be discharged through a suction device
- high weight bearing strap For ease of handling by treatment staff and patients
- Made in the form of a three-way, for ease of use by medical staff.
- Sterilized with ethylene oxide gas, Single package, Non-toxic, Non-febrile and Disposable.
- in carton 8 pcs

Infusion Burette Set

in carton 70 PCS

- Very smooth polypropylene roller valve to regulate liquid flow
- Spike is made of durable medical polypropylene with air filter roller valve
- Fully transparent tubes for viewing any bubbles inside the injection fluid and resistant to warping and twisting
- Three-way component for direct drug injection
- Latex injection site
- Air filter to prevent the entry of microorganisms from the outside environment
- Color indicator for automatic shut-off of liquid flow after complete discharge of burette and display of the amount of medicine in the burette compartment.
- Transparent and impact-resistant crystal chamber with a volume of 100 cc for accurate control of the injected liquid.
- Fully transparent and flexible drip chamber and micron dropper made of plastic with standard drop output with a volume of $60 \text{ drops equal to } 1 \pm 0.1 \text{ ml}$
- filter 15 micron to prevent any suspended particles from entering the patient's body
- Sterilized with ethylene oxide gas, Single package, Non-toxic, Non-febrile and Disposable.
- in carton 70 PCS

Infusion Burette Blood Set

in carton 70 PCS

- Very smooth polypropylene roller valve to regulate liquid flow
- Spike is made of durable medical polypropylene special design with air filter roller valve
- Fully transparent tubes for viewing any bubbles inside the injection fluid and resistant to warping and twisting
- Three-way component for direct drug injection
- Latex injection site
- Air filter to prevent the entry of microorganisms from the outside environment
- Color indicator for automatic shut-off of liquid flow after complete discharge of burette and display of the amount of medicine in the burette compartment.
- Transparent and impact-resistant crystal chamber with a volume of 100 cc for accurate control of the injected liquid.
- Fully transparent and flexible micro drip chamber and micron dropper made of plastic with standard drop output
- filter 15 micron to prevent any suspended particles from entering the patient's body
- Sterilized with ethylene oxide gas, Single package, Non-toxic, Non-febrile and Disposable.
- in carton 70 pcs

Suction Tube

Package Size 25 : 120 Pcs

Package Size 30 : 110 Pcs

- The suction head is made of hard materials and has a smooth outer surface and a suitable design to prevent blockage.
- It has the highest degree of flexibility to maintain the shape of the tube during suction.
- High transparency of medical grade granules.
- It has a suitable thickness to withstand high negative pressure and prevent rupture or collapse.
- Suitable length (about 2 meters) for ease of use during surgery.
- Sterilized with ethylene oxide gas, Single package, Non-toxic, Non-febrile and Disposable.
- in carton:
 - size 25: 120 pcs
 - size 30: 110 pcs
 - size 35: 100 pcs

Irrigator

in carton 1500 PCS

- This device is used to wash wounds, injuries and burns in the emergency room, operating room, clinic, medical centers or to wash laboratory equipment throughout the country.
- Two caps on the connector and spike to prevent environmental contamination from entering and the possibility of using this product several times.
- Spike resistant to entering the washing serum chamber with the ability to enter several times.
- Transparent tube made of medical grade granules.
- Polypropylene connector.
- Sterilized with ethylene oxide gas, Single package, Non-toxic, Non-febrile and Disposable.
- in carton 1500 pcs
